

Table of contents

<i>Foreword</i>	v
Estimation of precision and uncertainty of a calibration artefact for CMMs <i>S. D. Antunes, M. A. F. Vicente</i>	1
Uncertainty in semi-qualitative testing <i>W. Bremser, W. Haesselbarth</i>	16
Processing coherent anomalies on digitalised surfaces in wavelet domain <i>P. Ciarlini, M. L. Lo Cascio</i>	24
Least squares adjustment in the presence of discrepant data <i>M G Cox, A B Forbes, J L Flowers, P M Harris</i>	37
Harmonisation of correlated calibration curves with an application to the analysis of natural gases <i>M. G. Cox, S. Kamvissis, M. J. T. Milton, G. Vargha</i>	52
Parametrised approximation estimator for mixed noise distributions <i>D. P. Jenkinson, J. C. Mason, A. Crampton, M. G. Cox, A. B. Forbes, R. Boudjeema</i>	67
Algorithms for the calibration of laser plane sensors on CMMs <i>C. Lartigue, P. Bourdet, L. Mathieu, C. Mehdi-Souzani</i>	82

Statistical tools for metrology and testing: from data collection to decision making	
<i>C. Perruchet</i>	98
Metrology software for the expression of measurement results by direct calculation of probability distributions	
<i>G.B. Rossi, F. Crenna, M. Codda</i>	106
Feasibility study of using bootstrap to compute the uncertainty contribution from few repeated measurements	
<i>B. R. L. Siebert, P. Ciarlini</i>	122
Recursive and parallel algorithms for approximating surface data on a family of lines or curves	
<i>G. Allasia</i>	137
Process measurement impact on the verification uncertainty	
<i>J. Bachmann, J. M. Linares, S. Aranda, J. M. Sprauel</i>	149
On the uncertainty of a calibrated instrument	
<i>W. Bich, F. Pennechi</i>	159
Automatic differentiation and its application in metrology	
<i>R. Boudjeema, M. G. Cox, A. B. Forbes, P. M. Harris</i>	170

Use of non-central probability distributions for data analysis in metrology	
<i>A. Chunovkina</i>	180
Implementation of a general least squares method in mass measurements	
<i>J. Hald, L. Nielsen</i>	189
The GUM three design pattern for uncertainty software	
<i>B. D. Hall</i>	199
Statistical hypotheses testing for phase transition identification in cryogenic thermometry	
<i>D. Ichim, I. Peroni, F. Sparasci</i>	209
The impact of entropy optimisation principles on the probability assignment to the measurement uncertainty	
<i>G. Iuculano, A. Zanobini, G. Pellegrini</i>	219
Stochastic processes for modelling and evaluating atomic clock behaviour	
<i>G. Panfilo, P. Tavella, C. Zucca</i>	229
Compound-modelling of metrological data series	
<i>F. Pavese</i>	240

Homotopic solution of EW-TLS problems <i>M.L. Rastello, A. Premoli</i>	251
Pooled data distributions: graphical and statistical tools for examining comparison reference values <i>A.G. Steele, K.D. Hill, R.J. Douglas</i>	264
Numerical uncertainty evaluation for complex-values quantities: a case example <i>L. Callegaro, F. Pennecchi, W. Bich</i>	274
Bayesian approach to quantum states tomography <i>S. Castelletto, I. P. Degiovanni, M.L. Rastello, I. Ruo Berchera</i>	280
Simulation of charge transfer in a tunnel junction: approaching the sub- <i>e</i> scale <i>G.E. D'Errico</i>	283
Validation of calibration methods – a practical approach <i>E. Filipe</i>	286
Comparison of LS techniques for the linear approximation of data affected by heteroschedastic errors in both variable with uncertainty estimation <i>D. Ichim, P. Ciarlini, F. Pavese, A. Premoli, M.L. Rastello</i>	294

Noise correction for surface measurements <i>H. Haitjema, M.A.A. Morel</i>	300
Evaluation of uncertainty of standard platinum resistance thermometer at national laboratory level <i>M. J. Korczynski, A. Hetman, A. Szmyrka-Grzebyk, P. Fotowicz</i>	303
A new approach to the presentation of the result measurements in virtual instruments <i>M. J. Korczynsk, A. Hetman</i>	311
A Hybrid method for 11 approximation <i>D. Lei, J.C. Mason</i>	316
Interpolation equations for industrial platinum resistance thermometers <i>P. Marcarino, P.P.M. Steur, A. Merlone</i>	320
From the fixed point calibration to the certificate: a completely automated temperature laboratory <i>A.Merlone, P.Marcarino, P.P.P. Steur, R. Dematteis</i>	325
A new off-line gain stabilisation method applied to alpha-particle spectrometry <i>S. Pommé, G. Sibbens</i>	329

Development of software for ANOVA that can generate expressions of variance expectations	
<i>H. Tanaka , T. Kamoshita, K. Ehara</i>	332
Template matching in passive sonar recognition	
<i>J. L. Terry, D.A.Turner, J. C. Mason</i>	335
Fast computational alternative to Monte Carlo simulation of an output distribution	
<i>R. D. Willink and B. D. Hall</i>	339
